

## RESEARCH INTEREST

---

• Online learning • Distributed optimization • Minimax optimization • Game theory

## EDUCATION

---

- 2019 – present      **Université Grenoble Alpes, Grenoble, France**  
Ph.D. in optimization and machine learning  
Thesis: Minimax optimization and online learning  
Advisors: Franck Iutzeler, Jérôme Malick, and Panayotis Mertikopoulos
- 2018 – 2019      **École normale supérieure Paris-Saclay, Cachan, France**  
MSc degree in Mathematics, Computer Vision, Machine Learning (MVA)  
Grade: 18.05/20 (Success with Highest Honors)
- 2016 – 2020      **École normale supérieure, Paris, France**  
BSc degree and MSc in computer science. Grades: 17.22/20 and 17.6/20.  
ENS graduate degree as *normalien*
- 2014 – 2016      **Lycée du Parc, Lyon, France**  
Intensive preparatory program leading to competitive entrance exams to French Grandes Écoles

## INDUSTRIAL AND ACADEMIC INTERNSHIPS

---

- 2021 Oct. – 22 Jan.      **Amazon Development Center, Tübingen, Germany**  
Applied science internship—Multi-armed bandits and causality  
Supervised by Shiva Kasiviswanathan  
Focused on the interplay between multi-arm bandits and causality, with the general goal of understanding how causal knowledge can help improve bandit algorithms. The study of a specific stochastic bandit model led to a preprint that is now under review for NeurIPS.
- 2019 Apr. – Sept.      **Jean Kuntzmann Laboratory (UMR 5224 CNRS), Grenoble, France**  
Research internship—Extragradient and its variants  
Supervised by Franck Iutzeler, Jérôme Malick, and Panayotis Mertikopoulos  
Derived convergence guarantees of several extragradient-type methods for solving variational inequalities, with a focus on stochastic setting. (Published at NeurIPS 2019)
- 2018 Mar. – Aug.      **RIKEN Center for Advanced Intelligence Project, Tokyo, Japan.**  
Research internship—Weakly supervised learning  
Supervised by Gang Niu and Masashi Sugiyama  
Worked on semi-supervised learning, learning with noisy labels and positive-unlabeled learning. Main mathematical tools included concentration bounds and Rademacher complexity. (Published at ICML 2019)
- 2018 June – Aug.      **Behaviors.ai, Lyon, France**  
Research internship—Multimodal learning  
Supervised by Amélie Cordier and Mathieu Lefort  
Studied how to learn a shared latent representation from multimodal data through deep learning methods. Some related topics are transfer learning and developmental robotics.
-

## PUBLICATIONS AND PREPRINTS

## SERVICE

---

Reviewer at ICML (2020–), NeurIPS (2019–), and ICLR (2021–)

## DISTINCTION AND AWARDS

---

- Outstanding reviewer award at NeurIPS 2019 (top 10%), ICML 2020 (top 33%), ICLR 2021, and NeurIPS 2021 (top 8%)
- Spotlight at NeurIPS 2019
- Silver medal in International Mathematical Olympiad 2013

## TEACHING

---

2020 – 2022	Teaching assistant for the master course <b>Numerical Optimization</b> at ENSIMAG The course covers basic notions of convexity, optimality conditions, algorithms for continuous optimization, and duality.
